

Here are the **reference links** I recommend putting in the References section of your Bantay-Gubat website. I prioritized government, academic, and established Philippine environmental organizations.

Primary References

1. **Climate Change Commission — Sierra Madre: Mountain Range for Resilience**

Covers the Sierra Madre's length, forest cover, biodiversity, carbon-storage role, and importance for climate resilience.  Climate Chang...

[Climate Change Commission — Sierra Madre: Mountain Range for Resilience](#)

2. **Forest Foundation Philippines — Sierra Madre Landscape Profile**

Covers watersheds, biodiversity, typhoon protection, forest degradation, illegal logging, resource exploitation, and communities.  Forest Foundat...

[Sierra Madre Mountain Range: Landscape Profile \(PDF\)](#)

3. **Forest Foundation Philippines — Sierra Madre Landscape**

Useful for general background, protected areas, watersheds, biodiversity, and current conservation context.  Forest Foundat...

[Forest Foundation Philippines — Sierra Madre](#)

4. **van der Ploeg et al. (2011) — Illegal Logging in the Northern Sierra Madre Natural Park**

This is one of the most relevant academic sources for your topic. It specifically examines illegal logging, biodiversity, rural livelihoods, ecosystem destruction, and timber extraction in the Northern Sierra Madre.  JS...

[JSTOR — Illegal Logging in the Northern Sierra Madre Natural Park](#)

5. **Indiana University Digital Library — Full article/PDF**

Alternative access to the same 2011 academic study if you want a freely accessible copy.  Digital Library ...

[Indiana University — Illegal Logging in Northern Sierra Madre Natural Park](#)

6. **Barit, Choi & Ko (2022) — Modeling the Risk of Illegal Forest Activity in Southeastern Sierra Madre**

Academic research specifically examining illegal forest activity and its distribution in the southeastern Sierra Madre.  Himal...

[iForest — Modeling the Risk of Illegal Forest Activity](#)

7. **Forest Foundation Philippines — Sierra Madre Landscape Journey**

Useful for broader landscape governance, conservation, and stakeholder perspectives.  Forest Foundat...

[Sierra Madre Landscape Journey 2018–2020](#)

8. **GMA News — Sierra Madre and Nature-Based Solutions**

Useful for the **recent 2026 forest-loss figures**, including the estimate of 9,000 hectares of forest cover lost annually and 130,000 hectares from 2003–2020. GMA

attributes these figures to a Haribon Foundation study.

GMA News — Why are the Sierra Madre and nature-based solutions important?

For your website, I'd display them like this:

REFERENCES

Climate Change Commission. *Sierra Madre: Mountain Range for Resilience.* 2024.

Forest Foundation Philippines. *Sierra Madre Mountain Range: Landscape Profile.* 2022.

van der Ploeg, J., van Weerd, M., Masipiqueña, A. B., & Persoon, G. A. *Illegal Logging in the Northern Sierra Madre Natural Park, the Philippines.* Conservation & Society, 2011.

Barit, J. B., Choi, K., & Ko, D. W. *Modeling the risk of illegal forest activity and its distribution in the southeastern region of the Sierra Madre Mountain Range, Philippines.* iForest, 2022.

GMA News. *Why are the Sierra Madre and nature-based solutions important vs floods?* 2026.

For the **9,000 ha/year** and **130,000 ha figures**, I'd specifically put a small "**Source: Haribon Foundation, as reported by GMA News (2026)**" label directly underneath the numbers rather than presenting them as your own calculation.
